

NON VESA Timing—CRT to LCD Replacement

Direct replacement for all NON VESA timing CRT units. (Screen replacement only)

10" Standard and 12" option

Fits directly in place of your old CRT units with supplied bezel

Utilises same video signal as previous monitor

The Flatman TFT LCD Monitor from AJM Automation is an ideal space saving replacement for older CRT Monitors. The Flatman utilises the same video signal as your previous monitor, whilst it is also compatible with signals and timings outside of the standard VESA range. The TFT LCD will also fit directly in to the aperture from which a previous unit has been removed, using the supplied bezel. With the Flatman TFT LCD, installation is quick, easy and problem free.

This table shows a list of units which are compatible with the NON VESA Timing LCD unit. We recognise that other units are also compatible with the TFT LCD, with a minor signal adaptation.

Manufacturer	Control Type	Screen Size	Connector
Bosch	CC200	*	BNC
Bosch	CC300	*	BNC
Bosch	CL500 (EGA)	10,4"	9 pol.SUB-D
Bosch	DB500	10,4"	9 pol.SUB-D
